# **BIG TUNNEL** FOR PARK CITY

Will Be Run by New Company in South End of Camp.

## TAPS COUNTRY AT 2,000 FEET

CALIFORNIA'S DELAYED SHIP-MENTS-DANA CONTRACT.

RTICLES of incorporation for the South Quincy Mining company are now being drawn in this city, and during the next few days some of the best known mining men in this state will launch the enterprise which has for its object, among other things, the tapping of the district south of the Daly-West and Daly-Judge at depths ranging from 1,700 to 2,000 feet. The ground forming the basis of the company, which is to be capitalized for \$300,000 in \$1 shares, consists of twenty-six claims adjoining the Bonanza Consolidated on the southeast. They are owned by Ed H. Airis, W. H. Dodge and the Ira Clark estate.

Dodge and the Ira Clark estate.

The tunnel is now in a distance of about 400 feet, and contractors have a force of seven men at work driving it an additional 200 feet, at the conclusion of which the first contact will have been reached. The face is now in porphyry carrying a black sand from which free gold is readily obtained by panning, and as the first contact carries a great ledge between a lime shale and quartzite, with good gold values at the surface, its tapping is looked forward to with the keenest interest by those acquainted with the country. It is the intention to make the South

Quincy tunnel serve as a means of developing many of the properties along the south end of the district aside from the possessions of the company named, as well as a means of draining the wet portions of the mineral belt along the northern border of the Snake Creek

The enterprise is one of great magnitude, and its worth to the section of the Park City camp mentioned can hardly be overestimated, as the day is hardly be overestimated, as the day is approaching when the numerous properties now being opened in that end of the camp will have added several producing mines to the list. As soon as that happens a means of moving the ore to market will have to be provided. It will not pay to take the ore over the divides and ship from Park City. The outlet will be by way of Heber. The South Quincy tunnel will then come into play in much the same way as does the Ontario company's tunnel, as does the Ontario company's tunnel, which now connects the Daly-West and

## DANA LETS A CONTRACT.

### Tunnel to Be Sent in to the Ledge at Once.

A whole lot of life has been injected into the official household of the Dana Gold Mining & Milling company during Gold Mining & Milling company during the past few days, and from now on things are going to be made to hum at its property in Park valley. Joseph Dederich is president of the company and James J. Burke was the secretary and treasurer. The latter has resigned for lack of time to attend to the duties of the office, and Lawrence P. Kimball has succeeded him.

Mr. Kimball said yesterday that a contract had just been awarded for 200 feet of work in the tunnel, and the contractor was to leave last night to get operations under way. The tunnel is now in a distance of sixty-eight feet, and as the estimated distance to the ledge is only 250 feet, it is expected that the present contract will carry the face into ore.

The company's property consists of the ledge is which was leasted into the present contract will carry the face into ore.

The company's property consists of nine claims, which are located just over the hill north from the Century on the middle fork of Johnson creek, where, according to the report made upon the property last year by Frank B. Cook, there is water enough to run a good-sized mill, with a chance of developing considerable more by probing the springs which form the stream's source. In addition the ground is covered with growing balsam, fir and black pine timber, while there is chough dead and fallen timber to supply fuel for a steam plant for a year

more.
The surface workings along the ledge indicate that the ground contains a mine, and the company has now gotten in shape to go ahead and prove it. Assays of the rock near the surface have given returns of from \$2 to \$19.20 per ton in gold.

# CALIFORNIA SHIPMENTS.

Secretary Snyder Explains Why Only Eight Tons of Ore Came Down.

In explanation of the eight-ton shipment of concentrates from the California last week, Secretary W. I. Snyder said yesterday that it was due to the fact that it was impossible to get teams to do the hauling from the mine to the sampler. "For several days past," said he,

"about all the available teams in the camp have been employed in hauling machinery, lumber, timber, coal, etc., to the various new properties now hustling to get in shape for winter, and in consequence we have not been able to get our ore ald concentrates down the canyon. The situation is now being relieved, however, and before the week closes we expect to have at the sampler between 80 and 100 tons of concentrates, and two or three car-loads of first class ore."

The mill, Secretary Snyder added,

was doing good work, while the mine was constantly on the improve, and he felt certain that the property could be made to talk for itself from now

# CON. MERCUR'S POSITION.

With Regular Dividends and Increas-

ing Ore Reserves Stock Declines. Following the mailing of \$30,000 worth of checks in payment of its November dividend of 3 cents a share, word came down from the Consoli-dated Mercur company's property yesterday that a new body of ore has been opened in the Electric tunnel workings. It was encountered in the face of that avenue at a point below and 140 feet south of the Lulu incline, in absolutely virgin ground, and while its extent is yet undetermined, suf-ncient is known concerning it for the management to declare that it will

while just as regularly the market price of its shares declines. Every month it is paying a dividend of \$30,000 and adding to its surplus, while just as regularly the bear element in the market is contending that it cannot do it

It is a good thing for the share-holders that the market price estab-lished for the stock cannot in any way

have one of the best paying mines in the state of Utah and that, according to the best obtainable information, 2,000 tons of ore is being developed for 1,000 extracted.

STEELE CON.'S NEIGHBOR.

Company Forming to Operate Three Adjoining Claims.

In the interest of some prominent Salt Lake operators, Julius Goldberg has just completed the purchase of three claims adjoining the Steele Concorporation will be formed to operate them. The price paid for the ground is said to have been \$35,000, while the name of the new company will be the

Elkhorn.

The ground is understood to carry the same ledges that traverse the Steele group and the new company will 'undertake their systematic development at once. Further details were unobtainable pending the rounding out of the new company's plans and the signing of its articles of incorporation.

## Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$42,200, as follows: Silver, lead, gold and copper ores, \$27,900; bullion, \$14,300.

### Metal Market.

Silver, 49%c per ounce.
Copper, 11c per pound; New York,
\$11.30 to \$11.50 per 100 pounds.
Lead, \$3.50 per 100 pounds; New York,
\$4.12½.

## MINING STOCK MARKET. Week Opened With Stocks Still on

the Down Grade. The week on the mining exchange opened yesterday with the market even weaker than it closed on Saturday. Quite business was done in a number stocks and when the sessions closed it was found that a total of 95,110 shares,

with a selling value of \$35,585.74, had hanged hands.

Ajax sold at 31c and 32c, but closed or offering of 30%c. Carisa dropped 10 8c, and Consolidated Mercur to \$1.78 rom which it moved up 1½c at the after

from which it moved up 1½c at the afternoon call.
Daly-Judge held firm at \$9 and ten
shares of Daly-West sold at \$49, while
for 100 Grand Central \$4,97½ was accepted. Lower Mammoth was crowded
down from \$1.49 to \$1.46 and Mammoth
came out at \$1.72 to \$1.89.
Century held close to \$7c, and May Day,
after showing splendid comparative
strength at 25c to 25½c in the morning,
was finally squeezed down to 24%c at
the close.

was finally squeezed down to 24%c at the close.
California sold back from 31c to 25%c. Uncle Sam was steady at 30c to 30½c, as was also Sacramento around 26%c.
New York was listed and accorded about the same treatment that has greeted all the new ones on first appearance. It was started at 44½c and sold all the way down the line to 33c.
Wabash was again unmercifully hammered. It began selling at \$1.03, and before the day ended it had been delivered at 78c. An order came from somewhere just before the close of the afternoon open board session, and it began to move up again, the last sale being recorded at 82c.

The day closed on the following record final quotations and sales:

Treasury Statement.

Washington, Nov. 10.—Today's statement of the treasury balances in the general fund, exclusive of the \$150,000,000 gold reserve in the division of redemption. shows: Available cash balances, \$26,-223,319; gold, \$113,176,458.

GRAIN AND PROVISIONS

Chicago, Nov. 10,—Indifferent cables, liberal receipts in the northwest and the expectation of a large increase in the supply caused considerable selling of wheat early in the day. Later brokers bought freely for northwest account, which was said to be on reports of a large flour business in Minneapolis, while a prominent bull operator bought a large quantity of May through brokers. A good export demand was also a supporting feature. Longs were disposed to realize toward the close, but offerings were well taken. December opened unchanged to 'se lower at 71% 071%, declined to 71%, railied to 71%, and closed 40% clower at 71% 071%.

Corn was rather quiet and the market held fairly steady, although there was considerable liquidation, which had a weakening effect. December closed %c lower at 50% 50%.

Oats were dull. December closed %c lower at 30.

Provisions ruled weak as a result of receipts of hogs and lower prices. The close was lower, January pork closing 12% cdown, lard and ribs 5e lower.
